GA PRODUCT GUIDE

Grain Free Range

GA Product Code: **GFW**

Chicken & Salmon

with Sweet Potato

Kitten

Grain Free Range

The **Grain Free** range includes a selection of the finest freshly prepared nutritious and highly digestible animal protein sources.

The range has been formulated with sweet potato and potato to be suitable for those with grain intolerance/sensitivity.

Why Chicken?

Chicken is a **lean** protein source rich in essential amino acids. It is also a good source of vitamins & minerals including B vitamins and iron which may **help** contribute to overall health and well-being.

Why Salmon?

Salmon is naturally **rich** in omega 3 essential fatty acids which have anti-inflammatory properties and provide support for skin and coat condition and joint health.

Why do Kittens need a specific recipe?

Kittens grow quickly, within 6 months they will have reached approximately 75% of their adult body weight and so getting their diet right is vital to help them grow from a kitten into a healthy cat.

Our complete kitten recipe is formulated to provide young cats with the balanced nutrition and increased energy content that they require during growth. This includes a higher level of protein, rich in essential amino acids to support healthy muscle growth and added vitamin E to help support the immune system. The smaller kibble size of a kitten recipe also helps to make meal times easily manageable.

Recipe Claims

75% Total Chicken & Salmon

Rich in essential amino acids, vitamins & minerals to help support healthy muscle growth.

Minimum 26% Freshly Prepared Proteins

*Based on NRC recommendations of a kitten. All kittens are different and the guidelines should be adapted to take into account breed, age, temperament and activity level of the individual kitten. When changing foods please introduce gradually over a period of two weeks. Always ensure that fresh, clean water is available.

Important: The information provided in this document is GA Pet Food Partners Ltd interpretation of Regulation No 767/2009 including amending Regulations 2017/2279 and 2018/1903. As with all legislation only courts can decide on the correct interpretation of the law. We would advise that you always seek legal advice when creating/printing new packaging, leaflets or websites. The statutory Analytical Constituents declaration parameters (i.e. Crude Protein, Crude Fat, Crude Fibre, Crude Ash) may be used for declaration purposes along with Moisture. Other parameters are intended as a guide and in order to declare extra figures we suggest that analysis work is carried out to confirm levels more precisely. GA cannot be held liable for publication of none statutory nutrients without first getting approval from GA. GA cannot be held liable or responsible for nutrient contributions from free issue (client supplied) raw materials without specific clarification in writing. Formulation updates: As information becomes available and in order to continually meet statutory analytical constituent declarations, formulations may have to be adapted to account for raw material variation and availability. There may also be other reasons outside of our immediate control (including but not limited to force majeure events) which warrant the change of a formulation to improve its suitability. If any formulation amendment becomes a permanent change we will update the formulation matrix information and confer this to the purchaser.
